

PROJECT Whitepaper

TNTSwap is a DeFi platform based on Arbitrum, which integrates DEX, NFT and DAO. It aims to promote the automatic exchange of high-quality digital currency on Blast.

WELCOME TO TNTSWAP FINANCE

TNTSwap is a DeFi platform based on Blast, and integrates DEX,NFT,DAO,Game, and more.

Designed to promote free exchange transactions of Blast Eco - high-quality digital currencies, provide liquidity for transactions on Blast, provide one-stop liquidity services for more high-quality assets, provide users with a more secure and trusted, asset-diverse and cost-effective trading experience, and provide innovative blockchain applications for users.

TNTSwap——The DeFi platform based on Blast, and integrates DEX,NFT,DAO,Game, and more.

1 Introduction to TNTSwap

1.1 TNTSwap—DeFi platform based on Blast, and integrates DEX,NFT,DAO,Game, and more.

TNTSwap is a DeFi platform based on Blast, and integrates DEX,NFT,DAO,Game, and more. Designed to promote free exchange transactions of Blast Eco-high-quality digital currencies, provide liquidity for transactions on Blast,provide one-stop liquidity services for more high-quality assets, provide users with a more secure and trusted, asset- diverse and cost-effective trading experience, and provide innovative blockchain applications for users.

1.2 Products

TNTSwap, A DeFi platform developed based on Blast blockchain, will build a new Eco-Paradigm for DeFi NFT,DAO,Game, and continue to deliver practical, innovative products such as NFT,gaming and other market hotspot applications.

TNTSwap will minimize operational steps, increase the revenue dimension, lengthen the revenue cycle, and make it easy for users to earn multiple benefits with DAPP, provided that they are secure with their accounts and property.

01 TNTSwap APP

In terms of product presentation, TNTSwap will not only launch a website and access third-party wallets, but also will create an independent decentralized wallet, which will further reduce the difficulty for users to use DeFi and also enable TNTSwap products to be aggregated, Allowing users to use all our products with one click.

Allow users to have a simple and smooth product experience, satisfying the efficient use of cryptocurrency for the investors.

02 Dex

Based on the decentralized trading of the Fund Pool Auto-Marketing(AMM)and reducing the complexity of user

operations, TNTSwap's DEX products will support both transaction mining and liquidity mining, with the lowest transaction fee on the entire network at 0.2%.

TNTSwap Products

03

Twelve Constellations

Twelve Constellation is an innovative NFT system created by TNTSwap that integrates card, battle, collection, formation, player PK and other play, resulting in 12 levels of constellation NFT, corresponding to Aries and Taurus Constellation, Gemini, Cancer, Leo, Virgo, Libra, Scorpio, Sagittarius, Capricorn, Aquarius, Pisces, and each constellation NFT has different properties such as rarity, attack value, and so on. Twelve Constellation combines NFT with TNT economic models and mining mechanism depth to maximize empowerment wave and motivate players to participate. Let users enjoy both the fun of the game and the benefits of the TNTSwap mining incentives as they participate in NFT games.

04

Eco-games

TNTSwap will play a number of fun games for users during the development process, and all proceeds from eco-games will be used to feedback the TNTSwap itself, such as buying back TNT tokens or adding liquidity to TNT.

05

Blasturge

Blasturge is a protocol for inscription issuance, minting, and trading on the Blast Network. Blasturge is dedicated to creating the best inscription market on Blast with a unified standard for indexing.

06

DAO

TNTSwap will develop the Dao organization of the platform from the following three aspects:

DAO Fund

Fund for continuous research and development and expansion of TNTSwap community ecology.

DAO Governance

We will relentlessly pursue decentralized autonomy, and TNT-owned users will be able to initiate bills to the system and vote on bills related to block incentives, production reduction cycles, new currencies online, and so on.

Dao Community

A decentralized community forum that is a hub for TNTSwap users who can use TNT to enjoy quality content.

TNTSwap Products

07

AI Trading Assistant

The AI trading assistant enhances trading decisions through artificial intelligence. It analyzes market trends, price fluctuations, and relevant information using algorithms and big data analysis. This tool provides real-time suggestions and decision support for traders, enabling quick data processing, pattern recognition, and wise trading decisions.

08

Financial Derivatives

With the increasing trading volume and liquidity of TNTSwap, the platform will gradually enrich the product structure and develop more mature and available innovative derivatives trading, such as leverage products and futures products. But we will continue to follow the principle of decentralization.

09

Decentralized Lending

Based on Blast, TNTSwap will introduce decentralized lending products with multiple collateral options.

10

Cross-Chain Bridge

TnTSwap plans to develop cross-chain bridges to bring various blockchain ecosystems into Blast, enhancing liquidity for Blast projects.

11

IDO

Other early-stage projects on Blast can raise development funds through TNTSwap's IDO module, with TNT holdings meeting a specified amount for whitelist inclusion.

1.3 Features

When you use TNTSwap, you not only have the security of Ethereum and the speed of the Blast Network, but also the fair incentives and more interesting features of the TNTSwap platform.

AMM Trading

The decentralized trading platform based on the Automatic Market making mechanism (AMM) of the fund pool developed in Blast allows the exchange of any two tokens on Blast. It is also possible to further increase revenue through the methods of transaction mining and liquidity mining.

Fair mining incentives

Users can obtain mining rewards by trading on TNTSwap, providing liquidity, participating in ecological applications, NFT modules, etc.

Low Transaction fee and fast closing

Choosing Blast over Ethereum, TNTSwap prioritizes low gas fees and efficient transactions. Blast, being a rapidly growing and widely recognized Ethereum Layer 2 network, is the optimal choice for TNTSwap.

Handling fee

The transaction on TNTSwap will be charged 0.2% of the transaction fee. The transaction fee and other system income of TNTSwap will be used in full to add liquidity to the TNT trading pool or buy back the TNT token. The specific strategy will be decided by vote.

One-stop DeFi Hub

TNTSwap will build a one-stop DeFi platform on Blast, integrating DEX, NFT, Game, DAO, etc. Although DeFi is in the early stage of development, we can still make more user-friendly iterative products leading the market on this basis, so that users from different fields can try to trade cryptocurrency. To provide users with the most cutting-edge blockchain application services, innovation will be the booster of the rapid development of TNTSwap. Through a series of ecological applications, we will continue to empower TNT.

DAO Community Autonomy

TNTSwap is founded by a group of enthusiasts who love blockchain technology and decentralized concepts and is confident about DeFi and the future of decentralization. The goal is to create an organization based on blockchain technology and the community of DAO organizations, with the idea of creating community value. It is hoped that the management of the project will eventually be returned to the community and that decentralized operations will be truly realized.

Vault

In the unique incentive pool in the TNTSwap ecosystem, all TNT produced by mining will automatically enter the Vault by default and with a three-month freeze period. You can choose to continue to mortgage into the Vault Pool to enjoy dividends. If you choose to withdraw the proceeds in advance, a 50% penalty will be charged. The fine will automatically enter the Vault Pool, and the users locked in the Vault will be distributed weekly according to the proportion. The TNT obtained by the user when locked in the Vault Pool can be withdrawn at any time.

Multi-chain interoperability for transaction expansion

We will start the development of cross-chain bridges in the second phase, bringing more high-quality encrypted assets into Blast ecology. TNTSwap will support more cross-chain transactions, and the expansion of IDO will expand the value of TNT tokens raised.

2 Token Allocation

2.1 TNT Token Distribution

TNT Tokenomics

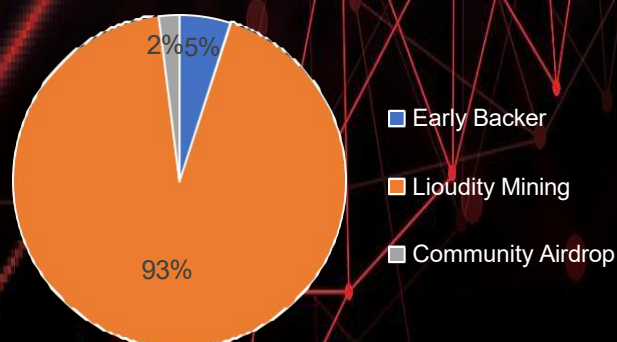

The total initial issuance of TNTSwap Token (TNT) is 1 billion, which is mainly distributed through liquidity mining. In order to allow the product to reach more users, we will airdrop 20 million TNT to loyal users. Our airdrop plan will be implemented in multiple stages.

In order to give back to early angel investors who support the development of TNTSwap, 5%, or 50 million TNT, will be given back to early angel investors. This part will be unlocked in blocks through smart contracts in 12 months after the mainnet goes online.

93% of TNT will be mined through liquidity staking on the mainnet.

10% of the TNT produced by mining will automatically enter the Dao fund account for continued research and development and ecological development.

TNT Distribution

Early Backer: 5 %

In order to give back to early angel investors who support the development of TNTSwap, 5%, or 50 million TNT, will be given back to early angel investors. This part will be unlocked in blocks through smart contracts in 12 months after the mainnet goes online.

Community Airdrop : 2 %

In order to allow the product to reach more users, we will airdrop 20 million TNT to loyal users. Our airdrop plan will be implemented in multiple stages.

Liquidity Mining: 93%

93% of TNT will be mined on the main network through transaction mining, mobile betting, NFT, games and other ecological applications. We set the 7 days after the main network launch as the creation mining period. During this week, the TNT output of each block is equal to twice that after the genesis mining period. Calculated from the end of Genesis mining, production will be reduced by 10% every 30 days.

TNTSwap Treasury

10% of the TNT generated by mining will automatically enter the community development fund account to promote the project's ongoing research and development and ecological development

2.2 Details of the Allocation of Liquidity Mining

TNTSwap's total mine pool will maintain 93% of the initially set wave total, 50 TNT will be released per

block (100 in the Genesis mining period), and in the initial setup, the trading pool, LP pool, NFT pool, game pool, and Vault pool will be allocated 30%, 40%,

18%, 7% and 5% of the mining output respectively. Our Team can increase or change the proportion of mines by proposing and voting.

3 Roadmap

TNTSwap will develop and deliver the products according to the plan. Here is our basic roadmap, we will try our best to complete it.

Q 3&4 2023

- 1.TnTSwap project initiation and completion of founding team formation
- 2.Complete DEX module design, development, and NFT testing
- 3.NFT Game module design
- 4.Ecological game module design
- 5.Vault module design
- 6.Design and Development of TNTSwap Mobile APP
- 7.Design of AI Trading Assistant Module

Q1 2024

- 1.TNTSwap official website launched
- 2.NFT game module development and testing
- 3.Development and testing of AI trading assistant module
- 4.Development and testing of the first ecological game DAPP
- 5.TNTSwap V1 released and gradually launched DEX, NFT, Game, and FarmCommunity building
- 6.Locus module design and development
- 7.Start the first round of community airdrops
- 8.TNTSwap mobile app launched

Q2 2024

- 1.The second round of air drop from TNTSwap community
- 2.TNTSwap Equity Token TNT Launched
- 3.TNTSwap Genesis Mining
- 4.Community forum launched
- 5.TNTSwap APP Upgrade
- 6.Multi regional community construction
- 7.TNTSwap V2 Contract Design and Development

Q3 2024

- 1.TNTSwap V2 Release
- 2.Cross chain bridge development
- 3.Upgrade of AI Trading Assistant
- 4.NFT Game Upgrade
- 5.Introduction of derivative trading

THANKYOU For your support

Summary

Thank you for your interest in our products. TNTSwap is committed to building a systematic DEFI platform so that all users can enjoy the security and convenience brought by layer 2.

SEE YOU
